

Products used for weed control around Power Ranch

Dimension (pre emergent herbicide) – Active Ingredient / Dithiopyr

Used to minimize weed seed germination in the landscape Winter and Summer and the dormant turf in the Fall

Round Up Pro (post emergent herbicide) – Active Ingredient / Glyphosate

Used to kill perennial weeds and grasses growing in the landscape year round

Reward (post emergent herbicide) – Active Ingredient / Diquat dibromide

Used to kill annual weeds growing in the landscape during the cooler seasons

R11 Spreader Activator (non ionic surfactant) – Active Ingredient / Alkylphenol ethoxylate, butyl alcohol. Added to post emergent herbicide mix to break down surface tension on the leaf of the weed for better weed control

Sedgehammer (occasional nutgrass control) – Active Ingredient / Halosulfron methyl

Used occasional as a spot treatment in areas where nut sedge is growing
